

Avast AntiTrack Premium

Disguise your online identity for greater privacy.

Keep your true identity private

When you're browsing, we disguise your online behavior so no one can build a profile on you.

Know when you're being tracked

When advertisers try to track your online activity, we automatically expose and block them.

Stop targeted advertising

When you're shopping online, we hide your purchases so you don't see the same ads.

Make Windows 10 work for you

Easily adjust system settings to keep your data private from data harvesters and hackers.

VPNs, ad-blockers, and incognito mode are not enough

VPNs don't stop tracking

A VPN will encrypt your connection, protect you on public Wi-Fi, and disguise your location, but advertisers can still identify you based on your PC and browser settings.

Ad-blockers break sites

Unlike anti-tracking software, ad-blockers affect the way websites look and work, and they need to be updated to keep up with the constant wave of new ads.

Incognito mode isn't incognito

Incognito mode prevents cookies, visited websites, and autocomplete fields from being saved, but it can't hide your IP address from advertisers.

Avast AntiTrack Premium completes your online privacy
